WHAT WE STAND FOR

We provides skilled teams with professional expertise for any given complex projects for sectors of Mechanical & Civil Sectors. Realizing our Vision, achieving and delivering value added results are the continuous goal of our company A strong history of quality service, professionalism and reliability has enabled ADAL NATIONAL to develop high class technical services, with the qualified management staff and professional technical teams, which allows us undertaking commitment of any type of projects regardless of Size and complexity.

Understanding and communication are very important aspects for any projects and will be carried out to meet the project needs. We ue our professional workforces and resources to achieve the challenging goals.

QUALITY CONTROL

PHILOSOPHY

Maintaining highest standards and quality output is the Management policy in first place.

The management emphasizes the principle that, every individual is responsible in the organization for the quality of the work that he or she performs is essential to achieve our goal of providing highest quality service to all our valuable clients.

ADAL NATIONAL has been successfully improving its services Quality levels and continuously improving the Quality procedures mirroring ISO standards to meet the expectations of clients.

OBJECTIVES

ADAL NATIONAL Quality Control Department (Q.C.D) operates with developed detailed QCD-Manual. The Manual describes the overall general quality requirements and the principles for implementation and accomplishment.

Quality Control Department continuously updates QCD -Manual to meet the standards of various types of projects and clients.

QCD develops project and Site Specific QA/QC and Project Quality plan (PQP), Manuals and programs, and client approval is obtained prior to the mobilization. The QCD assures these programs are implemented and strictly adhered to in their entirety and followed to build into product or activity, procurement and verified by means of review, inspection, testing, improves and audit time to time.

Objectives cont.

Scaffolding/supervisors & inspectors, Various equipment's operators, almost all type of certified welding staffs, Various Work permit and safety certified professional's etc. All certificates are regularly updates and arranges for higher trainings in terms of different departments to meet the services needs time to time.

ADAL NATIONAL field measuring/testing equipment's & tools are regularly calibrated certified and the vehicles are monitored with AVL systems and all heavy & light vehicles, Heavy equipment's are periodically inspected, recorded, audited by the QCD departments.

$\frac{3}{4}$ The Progress in achieving these objectives is regularly evaluated through periodic management and operation meetings.

QUALITY ASSURANCE

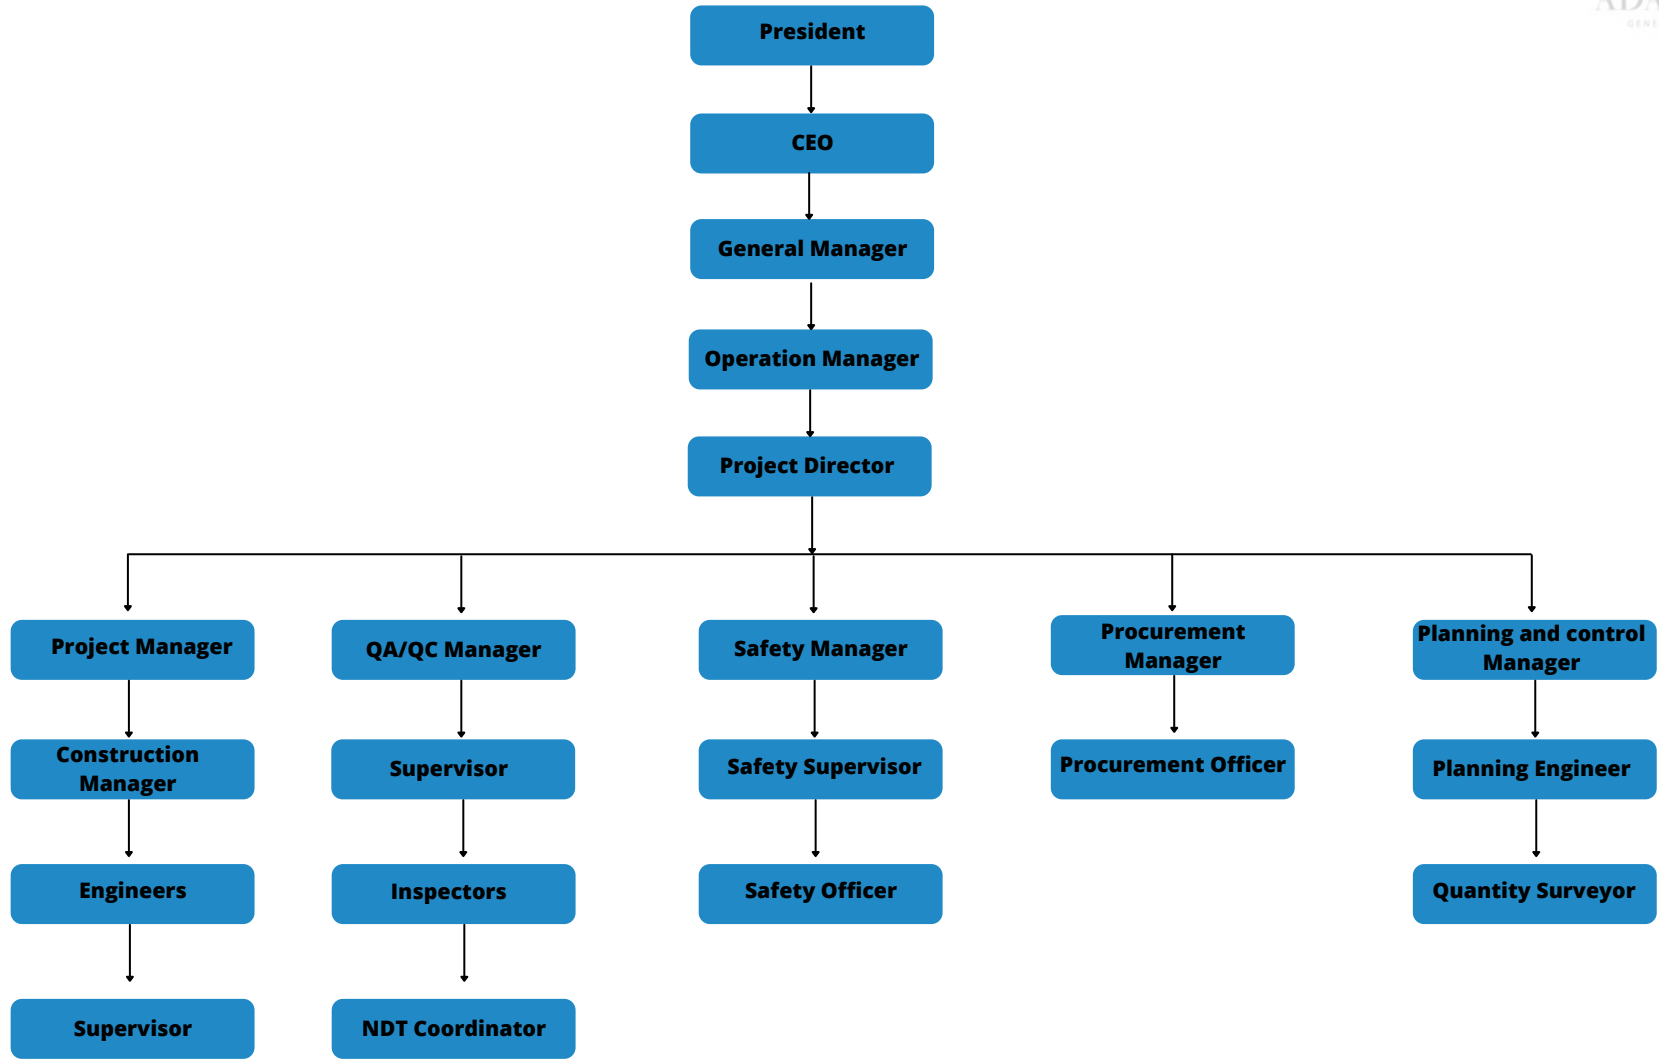

The Quality Assurance System is administrated through written policy, procedures, and instructions by QCD. Written instruction is provided to cover work, inspection, and test instructions for individual products and services.

Quality Records are generated through the implementation of the Quality Assurance System, to provide objective evidence of compliance and to measure the effectiveness of the system.

Qualified Independent Third Party Agencies are invited as and when required to accomplish the quality tests and assurances.
